7. Covid-19

- ☞ **Reservation of quarantine place** (For the probability of self-testing positive on first day of arrival in Korea)
- Upon your arrival at Incheon airport, you would have to do test with the self-test kit on the spot before moving to dorm at UNIST. However, if your self-test is positive, then you are not allowed to enter the dorm on the day of your arrival according to dorm policy. With this reason, it is our recommendation with a "better safe than sorry attitude" that you might as well book your quarantine place for 2 or 3 days in Ulsan area in advance. Just in case that if you get the positive result with the self-test. You might need a place where you can stay immediately. * You can find the place via Airbnb (Private Certified Housing on the internet)
- ※ You can cancel your reservation of the quarantine place. If you get negative COVID test with the self-kit but, small amount of cancellation fee would be charged.
- ※ If you get positive with the self-kit, you need to do PCR test at testing center on your arrival day or next day. (The result would come out next day)
- Then, you will be moved to rehabilitation center located in Ulsan area by an arranged ambulance (Cost of treatment and staying fee will be free of charge)

☞ PCR TEST

- Every inbound traveller is obliged to do COVID-19 tests on Day 1 (PCR) upon their arrival and Day 6/7 (self test kit) after entry into Korea. Therefore, after reaching your dorm, please go to the Health Center for PCR test on your arrival day or next day.
- ※ This is the address where you can get PCR test. (You need to go there on your own by taxi or bus)
